# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/KR2003/000616

I.	Basi	s of the report
1.	With	regard to the elements of the international application:*
	$\boxtimes$	the international application as originally filed
		the description:
		pages, as originally filed
		nages , filed with the demand
	_	pages, filed with the letter of  the claims:
		pages, as originally filed pages, as amended (together with any statment) under Article 19
		pages filed with the demand
	<b></b>	pages, filed with the letter of
-	Ш	the drawings:
		pages, as originally filed pages, filed with the demand
1		pages, filed with the letter of, filed with the demand
İ		the sequence listing part of the description:
١.		pages as originally filed
	·.	pages
:		pages, filed with the letter of, med with the demand
2.	Witl	regard to the language, all the elements marked above were available or furnished to this Authority in the language in which
	uie i	international application was filed, unless otherwise indicated under this item
	The	se elements were available or furnished to this Authority in the following language which is
		the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
		the language of publication of the international application(under Rule 48.3(b)).
		the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).
ļ		•
3.	Wit prel	h regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international iminary examination was carried out on the basis of the sequence listing:
		contained inthe international application in written form.
		filed together with the international application in computer readable form.
		furnished subsequently to this Authority in written form.
		furnished subsequently to this Authority in computer readable form
	$\Box$	The statement that the subsequently furnished written sequence listing does not go beyond the disc losure in the
		international applicationas as filed has been furinshed.
	Ш	The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.
4.		The amendments have resulted in the cancellation of:
·		the description, pages
	•	the claims, Nos.
1		the drawings, sheets
5.		
	Ш	This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box(Rule 70.2(c)).**
*	Repla in this and 7	cement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to opinion as "originally filed." and are not annexed to this report since they do not contain amendments (Rules 70.16 0.17).
**	Any r	eplacement sheet containing such amendments must be referred to under item I and annexed to this report.

#### INTERNATIONAL PRELIMINARY EXAMINATION

International application No. PCT/KR2003/000616

V. Reasoned s	tatement under	Article 35(2) v	vith regard to no	velty, inventive	step or industrial a	applicability;
citations ar	d explanations	supporting suc	ch statement			

1. Statement		
Novelty (N)	Claims 1-12	YES
	Claims	NO
Inventive step (IS)	Claims 1-12	YES
	Claims	NO
Industrial applicability (IA)	Claims 1-12	YES
	Claims	NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1: JP 03-290232

D2: JP 04-125128

The present invention relates to an apparatus for adjusting a rotation speed of a roller in a laminating including rollers, connection gears, a motor, a motor gear and a manipulating member, wherein at least one of the roller gears and the motor gears is a two-stage shift gear for adjusting differently speed of the forward rotation and the backward rotation.

D1 discloses a laminator including a thermal pressure roll, a vacuum bar, rotation transferring gears and an electromagnetic clutch to hold the rear end of a film by automatically changing the moving speed of the member, which holds the rear end of the film, correspondingly to the rotary speed of a pressure roll.

D2 discloses a laminator to enable precision working without giving a warpage to a product by driving the respective rollers so that the speeds of the upper and lower rollers are synchronized.

Compared with the present invention, none of the above-mentioned prior art documents disclose the roller gears or/and the motor gears provided with a two-stage shift gear to adjust differently speed of the forward rotation and the backward rotation. Moreover, such technical features of the claimed invention would not be obvious to the person skilled in the art and the prior art documents do not teach or fairly suggest such technical features as set forth in the present claims.

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

#### Continuation of:

٧.

Therefore, the subject matter of claims 1-12 is considered to be novel and to involve an inventive step and meets the criteria of PCT Article 33(2)-(3).

The subject matter of claims 1-12 is also industrially applicable to meet the criteria of PCT Article 33(4).
